Delivery charges are NOT included in the prices. All on the quotation.

---

**Jiffy 7C Pellets** are used extensively by growers all over the world to propagate a wide variety of seeds and cuttings.

## Media and container in one

- Made of RHP certified washed and buffered coco peat in a bio-degradable netting;
- Pellet manufacture is audited multiple times annually by RHP to ensure consistent pH and EC;
- Fertiliser is added to assist seedlings and cuttings in the early stages of growth;
- Pellet sizes vary from 20mmx35mm to 60mmx150mm (expanded diameter x expanded height).
- Wide range of pellet sizes accommodates different crop types and growing systems;
- Pellets are packed in cartons for easy transport and storage;
- All pellets have their own tray system;
- Applications vary from remote forestry in difficult African terrain to sophisticated hydroponic systems. In 2016 over 10 million Jiffy 7C pellets were used in Southern and East Africa;

**Jiffy-7C** is used by many professional greenhouse growers, Nursery men, foresters and others involved in growing and has become a favourite choice for the modern plant propagator.

Jiffy has recently introduced its **Microgreen Plate and Tray System.**

- It is a QSM (Quick Soil Media), cocopeat media plate measuring 30cmx40cmx5cm when expanded.
- The plate is made from RHP certified cocopeat without any fertiliser or wetting agents.
- The plate fits into 30cmx40cmx5cm (expanded dimensions), single cavity tray made of recycled plastic.
- The trays are reusable and the system suits growers supplying restaurants or stores as new trays of microgreens can be delivered while collecting used trays.
- The plates are easy to use, simply place in the tray and hydrate until fully expanded and you are ready to sow.
- Excess water will drain out through the holes in the base of the tray.
- The coco planks are washed, buffered and ready to use, according to RHP standards.
- Contact me - I'll get back to you in a Jiffy! (Sorry, couldn't resist that).

### Price List - November 2021
